

ISKANDAROV FIRDAVS

Software Engineer | Tashkent, Uzbekistan

github.com/IskandarovFirdavs
Python, JavaScript

EDUCATION

School No. 168, Tashkent, Uzbekistan

2016–Present

High School Student

Focused on software development through self-learning, building full-stack projects, and contributing to open-source hackathons.

EXPERIENCE

Frontend Engineer, College ERP (Hackathon Project)

MLH Open Source Marathon

2025

- Rebuilt UI for student marks dashboard & homepage, increasing user readability by 45% using custom CSS & JavaScript.
- Used GitHub collaboration, Git, and CI workflows to improve UX flows for student-teacher communication tools.
- Used Git, GitHub collaboration, and CI workflows for effective teamwork.

PROJECTS

1. IMDb Clone

[Frontend \(ReactJS\)](#) | [Backend \(DRF\)](#)

- Built full-stack movie review app with secure JWT authentication and protected routes.
- Integrated user watchlists, ratings, and detailed reviews using RESTful APIs and Django models.
- Used Axios, TailwindCSS, and DRF Viewsets for optimized performance and cleaner UI.

2. Instagram Clone

[Backend \(Django\)](#)

- Implemented story auto-deletion (24h) and real-time chat using WebSockets and Django Channels.
- Designed efficient data models for posts, likes, comments, and stories with optimized query performance.
- Integrated social-auth login flow with custom user logic and secure image upload handling.

AWARDS & HONORS

- Participated in **MLH Open Source Hackathon 2024**, contributing actively to a collaborative ERP project.
- Finalist at **Kids Hackathon 2024**, developed team-based educational platform and earned certification.

Activities

- Founder of a personal Telegram channel sharing tech learnings, startup ideas, and mistakes.
- Collaborated with global developers during open source marathons and code reviews.
